7AL-2 PLUS, PN 7222

**UPDATED
PRODUCT!**

You'll recognize the 7AL-2 Plus Ignition Control, as its predecessor is the most popular ignition control used in drag racing. The "Plus" model updates the original 7AL-2 with improved internal components that result in higher output. Plus, our engineers added a 2-Step Rev Control and a useful diagnostic LED.

Visually, you'll notice the two terminal strips that allow for easier wiring in your race car. The LED over the power connections will come in handy for troubleshooting as it flashes only when the coil fires. That way you know that the coil, the trigger source and ignition are all functioning properly. The housing is the same size as the 7AL-2 and is supplied with vibration mounts and a few

- Built-in two step rev control.
- Operates on 4, 6 or 8-cylinder engines.
- Troubleshooting LED for spark output diagnostics.
- Terminal strips for improved and easier wiring.
- Now works on 4, 6 or 8-cylinder engines.
