MSD 6A Ignition Controls, PN 6200

PN 6200

When it comes to performance for your dollars, an MSD 6A Series Ignition Control is still the best bang for your buck!

The MSD 6A, PN 6200 delivers hot multiple sparks for a full 20° of crankshaft rotation ensuring complete combustion of the air/fuel mixture. This produces quick starts, smooth idle, great throttle response and more power. The capacitive discharge design of the MSD Ignitions provide full power sparks throughout the entire rpm range of your engine which is a great benefit at higher rpm under load.

These ignitions will install to virtually any engine using a distributor with points, electronic amplifiers and magnetic pickups. This makes them a great addition to daily drivers looking for improved driveability, muscle cars, bracket racers and even Saturday night circle trackers.
