

### Street Fire<sup>®</sup> CDI Ignition, PN 5520

#### MSD's popular Street Fire brand of value based ignition components is expanding!

The Street Fire CD Ignition is ideal for the street enthusiast looking to boost the performance of their hot rod (while staying within their budget). The ignition delivers full power capacitive discharge sparks from idle to redline rpm to ensure all of the fuel is ignited and burned for total performance. And for engine protection, there's a built-in rev limiter that can be set to your specs.

At idle and cruising speeds, the multiple sparks of the CDI will deliver quick throttle response and smooth out the idle and even help reduce spark plug fouling.

The compact CDI installs easily to 4, 6 and 8 cylinder engines using a distributor with breaker points or an electronic pickup. For the low price, you cannot beat the Street Fire CDI!

- Capacitive Discharge technology for high voltage sparks
- Multiple Spark Series from cranking to 3,000 rpm
- Rev limiter is adjustable in 100 rpm increments
- Compact housing for easy installation

Part Number	Description	MVP Price	UPC
5520	Street Fire CDI Ignition	\$149.90	085132055203

### The complete performance electronics source

Ignitions, Coils, Spark Plug Wires, Timing Controls, EFI, Starters, Alternators, Magnetos, Gauges, Data Acquisition and more.
