Cylinder Number Indicators, PN 3414

**COOL
STUFF UNDER
\$25**

Sometimes, it's the little things that make a difference. You might not think about it now, but these simple little Cylinder Number Indicators will help you in the pits during last minute thrashes. The numbers clip on to the spark plug wires near the boot so you can easily tell the routing of each wire. They are molded from a firm plastic and are supplied on a slick little installation tool. They are available for 8mm wires, PN 3413, and up to 8.8mm, PN 3414.

Pro-Clamp Separators, PN 8843

Secure and proper routing of the spark plug wires is imperative to the life and performance of your spark plug wires. MSD's Pro-Clamp Separator Kit, PN 8843, will help you keep the plug wires in a tidy order and secure from heat sources.

Each assembly features individual grooves for each wire and a top bracket that snaps in place to hold the wires. Dupont Rynite material is used for a durable design and will not become brittle over time. Each base has a hole for a retaining screw if desired and a tab that will help hold it in position and no special tools are needed to take the Clamps apart! The kit is supplied with two 4-wire assemblies, two 3-wire assemblies and four 2-wire assemblies.
